

EDUCATION

Bachelor / Licence, Information Systems & Software Engineering **University of Algiers 1** **Sept 2021–June 2024**

- Major: Information Systems & Software Engineering
- Relevant Coursework: Algorithms & Data Structures, Operating Systems, Databases, Networks, Software Engineering
- Additional: Web Development, Distributed Systems, System Design

EMPLOYMENT

Software Engineer **Exacode** **Mars 2026–present**

- Designed and developed backend services using NestJS, PostgreSQL, Prisma, REST APIs, and WebSockets.
- Led technical architecture, documentation, testing, and development of a healthcare information system.
- Collaborated with frontend and backend engineers to deliver scalable and maintainable features..

Software Engineer **Alware** **July 2025–July 2026**

- Designed and developed backend services using NestJS, PostgreSQL, Prisma, REST APIs, and WebSockets.
- Led technical architecture, documentation, testing, and development of a healthcare information system.
- Collaborated with frontend and backend engineers to deliver scalable and maintainable features..

Software Engineer **HeroPay** **Jan–Jun 2025**

- Developed a React Native / Expo mobile application for contactless Tap-to-Pay transactions.
- Worked with NFC/contactless payment flows and integrated APIs to support secure transactions.
- Improved application performance and collaborated with backend teams on API integration.

Software Developer Intern **Code IT DZ** **June–Aug 2024**

- Developed an e-commerce/store management system using Django and Python.
- Implemented backend features, database models, and user-facing functionality.

SOFTWARE PROJECTS

Hospital Information System / ERP

- Architected a modern healthcare platform migrating a legacy desktop system to NestJS, Next.js, and PostgreSQL.
- Implemented RBAC, patient accounts, medical records, diagnostics, pharmacy stock, and result management.
- Designed REST APIs, database schemas, testing strategy, documentation, and deployment architecture.
- Utilized: NestJS, Next.js, TypeScript, PostgreSQL, Prisma, Docker, Redis, Nginx, Git, CI/CD

Multi-Tenant E-Commerce SaaS

- Designed a SaaS platform for creating and managing online stores with products, templates, subscriptions, and custom domains.
- Planned multi-tenant architecture, PostgreSQL data isolation, authentication, and payment integration.
- Utilized: Next.js, TypeScript, React, Tailwind CSS, PostgreSQL, Docker, PHP Laravel, inertia
- Improved application reliability through testing, observability, deployment, and CI/CD practices

Hackathon Projects

- Participated in multiple software hackathons and won two competitions.
- Built a Smart Warehouse solution using Node.js, React, PostgreSQL, Prisma, and MQTT.

SKILLS

Software: TypeScript, JavaScript, Python, SQL, Node.js, NestJS, Express, React, Next.js, React Native, PHP, Laravel, GraphQL, REST, WebSockets, inertia

Databases: PostgreSQL, MySQL, SQL Server, MongoDB, Redis, Prisma

DevOps / Tools: Docker, Kubernetes, Git, GitHub, Jenkins, Nginx, Linux, Postman, Figma
